

## iX ICE for ice machines, cubers and flakers

A refreshing cold drink isn't complete without ice! Freezing water to make ice causes the dissolved minerals in hard water to precipitate and coat working surfaces. This leads to increased energy costs and poor-quality ice. It will also lead to a reduction in ice production and will eventually cause equipment breakdown.

### BETTER QUALITY ICE AND ADVANCED EQUIPMENT PROTECTION

Make sure your ice cubes are bright and clear and protect your equipment from the potential damage of limescale.

iX ICE offers a new and ideal opportunity to bring down filtration costs whilst reducing your carbon footprint at the same time. Our iX ICE works with all major brands of flakers and cubers and comes with options for connections.

iX Head sold separately. [Click here](#) to view the Spec Sheet.

## Features & Benefits

- Comes in two sizes, 01 and 02
- Reduces sediment, odour, and bacteria from incoming water, providing consistent, clear ice cubes every time
- Service calls associated with corrosion, sediment and scale build up in commercial cubers and flakers are reduced
- Made in Britain & 100% Recyclable
- NSF Certified components & certified media
- Simple Installation
- Filter housing is re-usable, and filters are easy and economical to replace.
- No waste - replace & return the insert refill.

## A truly eco-friendly cartridge water filter.

With our insert refill technology, you can decide whether to quickly change by easily fitting a replacement cartridge or maximise cost saving and reduce environmental impact by just changing the insert.

## iX ICE Filter Specifications

|                      |                     |
|----------------------|---------------------|
| Flow Rate (Lpm)      | 7                   |
| Min Pressure         | 1.5 bar             |
| Max Pressure         | 6 bar               |
| Max Temperature (°C) | 35                  |
| Connections          | 3/8" PF or 3/8" BSP |
| Operating Position   | Vertical            |

This illustration serves as explanation of the filter technology. It is not to scale.
